Re: J/F 12 applicability

To whom it may concern,

Effective 10/16/2007, Quasonix transmitter model QSX-VSR-111-5E-20-6A was assigned J/F 12 ID number J/F 12/09140. Since that time, Quasonix has dramatically expanded our product catalog through a combination of new packages and optional features (counting all possible combinations of features, packages and options, our catalog now includes over 245,000,000 models).

All of these models share the same basic design and performance characteristics, in all modes and bit rates, as the part number stated in the J/F 12. Consequently, that original J/F 12 covers our entire transmitter catalog.

See the attached discussion of the Note to Holder process for more details.

Best Regards,

A handwritten signature in black ink, appearing to read "Terrance J. Hill", with a stylized flourish at the end.
