

2nd GENERATION RUGGEDIZED HANDHELD PROGRAMMER

Ruggedized Handheld Programmer

The easiest way to remotely control all transmitter functions without a bulky computer or monitor

- **Controls All Quasonix Transmitters**
Automatically opens a preinstalled Quasonix Transmitter Control utility
- **Automatic Detection of a Connected Quasonix Transmitter**
Detects and configures the Handheld Programmer based on the transmitter binary protocol version and the installed/enabled options
- **Intuitive Touch Screen Interface**
Operates transmitters with a simple tap
- **Basic, Options, and Advanced Screens**
Accesses common parameters enabled on the connected transmitter
- **Save and Recall Up to 16 Presets**
Uses software presets created via the Handheld Programmer
- **Internal Screen for Quick Transmitter RF Functionality Testing**
No external clock or data source available? No problem!
- **Displays Actual RF Status**
Screen indicators always show the current RF status; separate indicators for each channel on a Dual Transmitter
- **Terminal Menu and ASCII Passthru Mode**
Provides access to all transmitter commands without an attached computer or monitor; ASCII Passthru available on newer transmitters
- **Includes International Power Adapter, Rechargeable Li-ion Battery, USB Cable, and Stylus; Built-in RS-232 Serial Port**
